

When the machine stops, we start. | Local knowledge. Industrial-grade capability.

ENGINEERING SOLUTIONS YOU CAN COUNT ON.

For nearly two decades, Pinney Engineering Services has kept industry moving. From urgent breakdown repairs and precision CNC components to complex refurbishment work, we deliver practical, fit-for-purpose machining solutions from our Caboolture workshop - on time, and without the fuss.

If it's worn, broken, obsolete or simply hard to source, bring us the part and we'll get it done.

CORE SERVICES

CNC MACHINING

Precision CNC turning & milling for custom parts, repair components and repeat production. Metal and industrial plastics.

MACHINE SHOP

Lathe work, milling, surface grinding, drilling, part modification and engineered component manufacture.

WELDING & FABRICATION

Workshop fabrication, welded repairs and custom steel work for industrial and mechanical applications.

INDUSTRIAL COMPONENT REPAIR

Repair, reclaim and refurbish worn or damaged parts, reducing downtime and replacement costs.

REVERSE ENGINEERING

Reproduce obsolete or hard-to-source parts from samples, worn components or drawings.

SHAFT REPAIR & KEYWAYS

Shaft repairs, keyway machining, marine shafts and stainless steel rotating component work.

HEAVY EQUIPMENT REPAIRS

Component machining and refurbishment for heavy machinery, hydraulics and rotating equipment.

CUSTOM COMPONENTS

Bushes, flanges, pins, pulleys, sheaves, manifolds, hydraulic adaptors and one-off engineered parts.

INDUSTRIES SERVED

- Industrial manufacturing
- Agriculture
- Marine & automotive
- Heavy equipment & mining
- Transport & logistics
- Energy & resources
- General engineering

COMMON COMPONENTS

- SHAFTS
- KEYWAYS
- BUSHES
- SLEEVES
- PINS & ROLLERS
- FLANGES
- PULLEYS
- SHEAVES
- MANIFOLDS
- HYDRAULIC BODIES
- NYLON PARTS
- BEARING JOURNALS
- CONVEYOR ROLLERS
- OFFSET AXLES
- CUSTOM PARTS
- OBSOLETE PARTS

WHY PINNEY

- Local & Responsive**
Caboolture-based, fast turnaround, no big-shop delays or runaround.
- 20+ Years Experience**
Deep knowledge across repair, refurbishment and custom manufacture.
- Practical Problem-Solving**
Fit-for-purpose outcomes focused on getting you operational again.
- Breakdown Priority**
Emergency component repair & manufacturing prioritised - actioned within 24-72hrs, depending on the complexity.
- Quality Workmanship**
Old-fashioned values, clear communication, reliable outcomes.

Trusted by manufacturers, councils, agricultural operators, automotive and heavy industry.
